

Zoological Disaster Response, Rescue, and Recovery (ZDR3)

Supporting Facility

If your facility is unable to join the ZDR3 network by signing the ZDR3 Memorandum of Understanding (MOU), you are still welcome to participate in the network as a Supporting Facility.

Areas of participation may include:

- Donation or loan of supplies and resources to support ZDR3 response activities
- Transport and/or temporary housing for animals that require relocation
- Funding support for ZDR3 or network facilities during crisis

Individual activities may require appropriate documentation (eg, temporary placement agreements for animal relocations), and will be addressed on an as-needed basis.

Crisis response to Supporting Facilities by the ZDR3 network will be managed in the same manner as ZDR3 MOU holders, based on the availability of resources. If necessary permissions are granted and resources are available, ZDR3 will provide support services to Supporting Facilities.

By signing below, you acknowledge a willingness to provide support to the ZDR3 network when and if able, but are under no obligation or binding agreement.

Date: _____

Name of Institution: _____

Printed Name: _____

Title: _____

Signature: _____

Email: _____

Phone: _____

You will be receiving a questionnaire regarding the best points of contact for your facility and resources that you may be able to provide.
